### PROJECTS

#### Project 1:

**Name** : Website(Marine Life)  
**Team Size** : Two.  
**Role** : Coding and Template designing.  
**Technology used** : Html, CSS, Java Script.  
**Description** : Developed a Website that tells about the Marine Life, different species found under oceans and it also helps people to explore about aquatic life in single click.

#### Project 2:

**Name** : Startup Project.  
**Team Size** : Two.  
**Role** : Frontend Developer.  
**Technology Used** : I worked in creating an interactive web page using Html, CSS, CSS Framework i.e., Bootstrap JavaScript and JavaScript Frameworks.  
**Description** : Developed a responsive website that help us to book cooks online. It helps user to find the cooks whenever we required and will show the available cooks from nearby areas. The main motive of this website is to help the users to book cook in a single click. I have learned a lot while developing this project. It taught me how to solve a real-world problem dynamically and most importantly how to split modules and work in a team apart from technical skills, I have also built a lot of self-confidence inside me.
